```javascript
// reverse a hello word without using methods'

let str="hello";
let value="";
for(i=str.length-1;i>=0;i--){
value+=str[i];
}

console.log(value);
```

Output:- olleh

```javascript
//  remove spaces between a sentence'

let str="       welcome  everyone ";
let value=str.trim();
console.log(value);
```
Output:- welcome everyone

```javascript
// print before letters of every charecter
// by using askey values'

let inputString = "Akshaya Nayakidi";
let result = "";

for (let i = 0; i < inputString.length; i++) {
    let asciiValue = inputString.charCodeAt(i);
    if (asciiValue > 0) {
        let previousAsciiValue = asciiValue - 1;
        let previousChar = String.fromCharCode(previousAsciiValue);
        result += previousChar;
    }
}

console.log(result);
```

Output:- @jrg`x` ▼M`x`jhch
